INTRODUCTION

This report is a compilation of data collected from Montana public libraries for the fiscal year July 1, 1989 - June 30, 1990. Included are statistics reported by the libraries as well as selected per-capita computations.

The 82 main public libraries in the state have been assigned to one of seven groups based on the legal service area population (not the city population). Legal service area population is the number of people in the geographical area for which a public library has been established to offer services and from which the library derives income, plus any areas served under contract. The legal service area population of each group, (0-999; 1000-1799; 1800-2999; 3000-5799; 5800-9999; 10000-19999; 20000-109000), is an attempt to organize libraries into the most homogeneous groups possible for purposes of comparison.

The Montana State Library based questions asked of libraries on those designed for the Federal/State Cooperative System (FSCS). FSCS, part of the U.S. Department of Education, is developing and compiling standardized national public library statistics. Nearly all states are participating in this process. Within the next few years, FSCS organizers expect all 50 states to be involved.

Except in cases where data supplied were illogical or when there appeared to be typographical errors, the data presented in this publication are as reported by the participating libraries. A few libraries did not return their statistical report forms; others returned them promptly. The majority of public libraries contributed to the project, so this report will be of use to those working on budgets or researching specific library-related topics.

Included at the end of the statistics report is a copy of the report form used by the libraries, as well as the instructions for completing the form. Questions that arise while using this report might be answered by referral to the report form or to the instructions.

Comments and questions are welcome concerning the design of the form and/or the wording of the questions.

PLEASE NOTE THE FOLLOWING BEFORE USING THIS REPORT:

• Public libraries receive support from various sources. The column headed "Service Area" indicates the number of people in the geographical area for which a public library has been established to offer services and from which the library derives income, plus any areas served under contract. In many cases, this number does not reflect the actual numbers served on a day-to-day basis. In some cases, libraries supported by county funds are bound to serve the whole county, but in reality, the library is used only by inhabitants of the limited area surrounding the library. Therefore, this report also includes columns headed "Pop. Area." Population area is the population of the city, town or area (taken from 1988 U.S. Dept. of Commerce reports) which reflects the size of the pool of persons from which actual library users come. (Note: Columns headed "Percent registered" and "Per capita income" are based on legal service area population.)

• On Table II - "Staff Information *," the heading "ALA Master's" indicates the number of librarians with master's degrees from American Library Association (ALA)-accredited library science programs. "Other Master's Degree" indicates the number of librarians with other master's degrees.

• On Table III - "Library Income," the heading "Other Income" includes the following items: Coal Severance Tax (CST), Interlibrary Loan Reimbursement, House Bill 193, donations, interest, fines, etc.

• "Public service hours per week" indicated in Table VII includes both main and branch library hours. The annual public service hours indicates the sum of all public service hours for all library facilities (including bookmobiles) for the entire year.

• Data totals for libraries with branches include branch information because most libraries do not keep separate statistics for their branches.
